Certification & Start-up

To whom it may concern:

Certification is not required to install or service any of our products.

However, the Exception - Airport Parking Garage Start-ups.
In the past we have had too many problems with start-ups in these facilities. RSEC must be present to check out the wiring before power is applied. This is an extra charge and will be added to material bid and will vary for each location.

Also, we recommend that installation be done by a qualified electrician and installed in accordance with the National Electrical Code.

Installation of this product will satisfy NEC 1999 paragraph 514-6 and NEC 2002 - 2020 paragraph 514.13 for the elimination of feedback in service station dispenser control wiring.
